Journal of Applied Developmental Psychology

INFORMATION FOR AUTHORS

The *Journal of Applied Developmental Psychology* is intended as a forum for communication between researchers and practitioners working in life-span human development fields. Articles describing application of empirical research from social and behavioral disciplines bearing on human development are appropriate. Conceptual and methodological reviews and position papers which facilitate application of research results to such settings as educational, clinical, and the like, are also welcome. Recommendations for intervention or for policy are appropriate when data based.

Review of manuscripts: Authors should remove any identifying information from the manuscript. All necessary information pertaining to identification, title, institutional affiliation, etc. should be on a cover page and only the title of the manuscript should appear on the first page of the manuscript.

Articles submitted must contain original material which has not been published and which is not being considered for publication elsewhere. Papers accepted by the journal may not be published elsewhere in any language without the consent of the Publisher.

MANUSCRIPT REQUIREMENTS

Please see <http://ees.elsevier.com/jadp> for full instructions.

All manuscripts must be submitted online via the Elsevier Editorial System (EES) page at <http://ees.elsevier.com/jadp>. Authors, reviewers and editors send and receive all correspondence by e-mail and no paper correspondence is necessary. Full, detailed information about this electronic submission process and specific instructions on how to submit manuscripts can be found at the EES page. Problems encountered while submitting online can be resolved by emailing authorsupport@elsevier.com.

Style: Manuscripts must adhere to the instructions on references, preparation of tables and figures, abstracts, manuscript format, etc. as described in the Publication Manual of the American Psychological Association, 5th edition. Manuscripts that do not conform to the style set forth in this manual will not be acceptable for submission and will not be reviewed. The title of the paper, the author's name and full postal address should be included and the name and address of the organization where the work was conducted should be indicated on the cover sheet of the paper. Please supply the corresponding author's telephone/fax number and E-mail address.

Tables and Figures: All tables and figures should be grouped together at the end of the manuscript and numbered separately using Arabic numerals. Clearly visible notes within the text should indicate their approximate placement. The appropriate format for figures is described at the Author Gateway page mentioned above.

Abstracts: An abstract for a research paper or review article should be 100 to 175 words. General style should be the same as that of the article.

Keywords: Authors should include 5-7 keywords on the submission.

Use of 'gender' vs. 'sex': Gender is a term to refer to social categories and is referenced by the terms masculine and feminine. Sex is a term to refer to a differentiation based on male-female. Therefore comparisons between males and females (or boys and girls) should be referred to with the term "sex" unless their masculine and feminine traits are part of the classification.

Terms denoting ethnicity: When describing race/ethnic group we request that authors use terms designating ethnicity (e.g., African-American, African-Caribbean, Anglo-American, Hispanic-American, Asian-American, Chinese-American) instead of terms designating race (e.g., White, Black) to refer to participants in your own study and in studies reported in your paper whenever feasible. We recognize that in describing procedures and results, authors will need to use the terms that they used in their studies so references to skin color (White, Black) may remain.

Author Inquiries: For inquiries relating to the submission of articles, please visit the EES page at <http://ees.elsevier.com/jadp>. EES also provides the facility to track manuscripts.

English language help service: Upon request Elsevier will direct authors to an agent who can check and improve the English of their paper (before submission). Please contact authorsupport@elsevier.com for further information.
